

# Package ‘tabulate’

October 14, 2022

**Title** Pretty Console Output for Tables

**Version** 0.1.0

**Description** Generates pretty console output for tables allowing for full customization of cell colors, font type, borders and many others attributes. It also supports 'multibyte' characters and nested tables.

**License** MIT + file LICENSE

**Encoding** UTF-8

**RoxygenNote** 7.1.2

**LinkingTo** Rcpp

**Imports** cli, magrittr, rlang, Rcpp

**SystemRequirements** C++11

**URL** <https://github.com/mlverse/tabulate>,  
<https://mlverse.github.io/tabulate/>

**BugReports** <https://github.com/mlverse/tabulate/issues>

**Suggests** rmarkdown, testthat (>= 3.0.0), emoji

**Config/testthat.edition** 3

**NeedsCompilation** yes

**Author** Daniel Falbel [aut, cre],  
Pranav Srinivas Kumar [aut, cph] (Author of included Tabulate code),  
Martin Moene [aut, cph] (Author of included Variant-lite code),  
Ihor Kalnytskyi [aut, cph] (Author of included Termcolor code),  
RStudio [cph]

**Maintainer** Daniel Falbel <daniel@rstudio.com>

**Repository** CRAN

**Date/Publication** 2022-02-16 08:20:01 UTC

## R topics documented:

formatting . . . . .	2
tabulate_demo . . . . .	5
tabulate_table . . . . .	5

---

**formatting***Formatting of tables, columns, rows and cells*

---

**Description**

Allows changing display characteristics of tables, columns, rows and cells.

**Usage**

```
format_background_color(x, value)
format_border(x, value)
format_border_background_color(x, value)
format_border_bottom(x, value)
format_border_bottom_background_color(x, value)
format_border_bottom_color(x, value)
format_border_color(x, value)
format_border_left(x, value)
format_border_left_background_color(x, value)
format_border_left_color(x, value)
format_border_right(x, value)
format_border_right_background_color(x, value)
format_border_right_color(x, value)
format_border_top(x, value)
format_border_top_background_color(x, value)
format_border_top_color(x, value)
format_color(x, value)
format_column_separator(x, value)
format_column_separator_background_color(x, value)
```

```
format_column_separator_color(x, value)
format_corner(x, value)
format_corner_background_color(x, value)
format_corner_bottom_left(x, value)
format_corner_bottom_left_background_color(x, value)
format_corner_bottom_left_color(x, value)
format_corner_bottom_right(x, value)
format_corner_bottom_right_background_color(x, value)
format_corner_bottom_right_color(x, value)
format_corner_color(x, value)
format_corner_top_left(x, value)
format_corner_top_left_background_color(x, value)
format_corner_top_left_color(x, value)
format_corner_top_right(x, value)
format_corner_top_right_background_color(x, value)
format_corner_top_right_color(x, value)
format_font_align(x, value)
format_font_background_color(x, value)
format_font_color(x, value)
format_font_style(x, value)
format_height(x, value)
format_hide_border(x)
format_hide_border_bottom(x)
format_hide_border_left(x)
```

```

format_hide_border_right(x)

format_hide_border_top(x)

format_locale(x, value)

format_multi_byte_characters(x, value)

format_padding(x, value)

format_padding_bottom(x, value)

format_padding_left(x, value)

format_padding_right(x, value)

format_padding_top(x, value)

format_show_border(x)

format_show_border_bottom(x)

format_show_border_left(x)

format_show_border_right(x)

format_show_border_top(x)

format_width(x, value)

```

### Arguments

- |       |  |
|-------|--|
| x     | A table, column, row or cell.                |
| value | The value assumed by the selected parameter. |

### Value

The same as the input invisibly.

### Examples

```

table <- tabulate_table()
table %>%
  table_add_row("hello") %>%
  table_add_row("world")

table %>%
  format_hide_border_bottom() %>%

```

```
format_width(50)  
table
```

---

tabulate_demo	<i>Generated demonstration tables</i>
---------------	---------------------------------------

---

### Description

Print two tables showing most of possible functionalities in tabulate.

### Usage

```
tabulate_demo()
```

### Value

NULL invisibly.

---

tabulate_table	<i>Create a new tabulate table</i>
----------------	------------------------------------

---

### Description

Create a new tabulate table

### Usage

```
tabulate_table()  
table_add_row(table, row)
```

### Arguments

table	A table created with <a href="#">tabulate_table()</a> .
row	A character vector or a tabulate table.

### Value

A `tabulate_table`.

### Functions

- `table_add_row`: Adds rows to the table.

**Examples**

```
table <- tabulate_table() %>%  
  table_add_row("hello") %>%  
  table_add_row("world")  
table
```
